Subject Index to Volume XXI

Acrylamide, for enzyme immobilization, 1543
Activated carbon, for enzyme immobilization, 461
Activated sludge process, dynamics of, 1561
Aeration, measurement of, 907, 2125
Affinity chromatography, elution of trypsin in, 341
  of endoglucanase, 167
Aflatoxin, production of, 1799
Agarose, for enzyme isolation and purification, 167, 775
Agitation, power drawn by, 2341
  role in nitrification, 1457
Airlift, fermentors, 69, 1579
  for bacterial leaching, 1677
Alcohol dehydrogenase, effect of shear on, 2261
Alcohols, microbial electrode sensor for, 1845
Alfalfa, fermentation of for protein recovery, 551
Algae, photosynthesis, mechanisms of, 159
  protein production by, 1191
Alginate gels, for cell immobilization, 2155
Alkaline phosphatase, immobilized, 711
Alkylamine porous silica, for enzyme immobilization, 505
D-Amino acid oxidase, immobilized, 939
Aminoacylase, immobilized, 477
Aminohexyl cellulose, for enzyme immobilization, 477
β-Amylase, immobilized, 505
Anabaena cylindrica, hydrogen production by, 1855
Anaerobic filter, gas production in, 333
ATP, as biomass indicator, 153
  assay, in brewery wastewater treatment, 1301
Azotobacter vinelandii, immobilized, nitrogenase activity of, 271

Bacillus subtilis, milk clotting enzyme from, 535
Balances, carbon and redox in gaseous metabolism, 609
  elemental, for microbial process design, 1289
  in modeling penicillin fermentation, 2175
  mass-energy regularities, 575, 2203
  material, for fermentation processes, 1487
Basalt rock, biodegradation of, 875
Biological waste treatment, 417, 561, 1191, 1301, 1561, 1787, 2169
  activated slude process, 1561
  rotating biological contactor, 1787
  trickling filter, 417
Biomass, accumulation in porous structures, 49, 59
  continuous production of, 1809
  recycling in continuous culture, 627
  concentration, ATP as indicator of, 153
  measurement, by capacitance, 1097
  by viscometer, 519
  formation, energetic efficiency of, 725
Brazil, ethanol production in, 1107
Brevibacterium ammoniagenes, immobilized, 887
Brevibacterium sp., amino acid profile of, 1981

Candida lipolytica, citrate production by, 1373
Candida utilis, cytochromes maximization of, 803
  growth and physiological characteristics of, 1827
  metabolic pathways in, 2337
  protein production by, 1163, 1175, 1963
Carbon dioxide, fixation by immobilized chloroplasts, 253
  solubility in fermentation media, 1075

Carrageenan, for enzyme and cell immobilization, 1697
Catalase, effects of shear on, 2279
immobilized, 89, 2061
Cell disintegration, 1, 745
measurement of, 1861
Cell lysis mutants of *S. cerevisiae*, 659
Cell walls, yeast, enzymatic lysis of, 2011
Cells immobilized, 261, 271, 679, 887, 1019, 1697, 1711, 2133, 2155
Cellulase, production by *Trichoderma reesei*, 181, 283, 1887
Cellulose, degradation of, 909
ethanol production from, 1387, 1401
hydrophobic esters of, 2113
structure and susceptibility to hydrolysis, 1031
Cellulose hydrolysis, by commercial enzymes, 1091
enzymatic, mechanism 131
model for, 997
susceptibility to, 1031
Centrifuge, high-resolution, 317
Chemostat, start-up, 111
Chicken liver xanthine dehydrogenase, immobilized, 1767
Chitin, for enzyme immobilization, 1333
Chloroplasts, immobilized, 253
Citric acid production, 297, 2083, 2093
Continuous microbial processes, 173, 283, 297, 357, 575, 627, 803, 1121, 1163, 1277, 1387, 1517, 1809, 1827, 1887, 2149
cellulase production, 283, 1887
citric acid production, 297
dynamics of, 357
mass-energy balances in, 575
productstat control of, 173
species competition in, 627
Controller, oxygen, exponential, 1469
Copper, solubilization from ore, 1685

Denitrification, enzymatic, 1079
in rotating biological contactor, 1787
Dextran, biosynthesis and dextransucrase production, 1121
microbeads for cell culture, 2351
Diacetyl, removal from beer, 649
Diacetyl reductase, for treatment of beer, 649
Diffusion, external, effect on immobilized glucose isomerase, 2023
in immobilized-enzyme reactors, 2303
limitations and floc size, 221

Efficiency, assimilation, of phototropic bacteria, 787
energetic, biomass and product formation, 725
Electrode, enzyme, chemically modified, 1877
bioprobe, for phenol, 671
fast-response oxygen, 907
microbial for alcohols, 1845
Electrophoresis, buffer recirculator for, 2147
Endoglucanase, of *Trichoderma viride*, 167
Endomyces lipolytica, growth on hydrocarbons, 955
Energy content, of phototrophic bacteria, 787
Enzyme, milk-clotting, from *Bacillus subtilis*, 535
Enzyme electrodes, 671, 1877
Enzyme thermistor, 1749
Enzymes, immobilized, 39, 89, 393, 461, 477, 505, 689, 715, 711, 897, 939, 1057, 1079, 1317, 1333, 1345, 1499, 1543, 1607, 1629, 1639, 1697, 1711, 1767, 1905, 2023, 2061, 2235, 2279, 2359, 2365
deactivation, 89, 1345, 2061
magnetic supports for, 393, 2359
preparation of, 393, 461, 477, 505, 715, 847, 867, 939, 1317, 1333, 1629, 2359, 2365
kinetics of, 1649, 2235
light induced, 443
production, 181, 283
purification, 535, 775, 915
Equine liver alcohol dehydrogenase, isolation of, 775
Escherichia coli, growth and composition of, 1043
Ethanol, fermentation kinetics, 1477
microbial protein from, 1221
Ethanol production, Brazil, 1107
from cellulose hydrolysate, 1387, 1401
from sugar cane, 2347

Fed-batch culture, 11, 283, 1221
Feedstuff, protein, from poultry manure, 19

Fermentation products, volatile, extraction of, 1881
Fermentors (see Reactors, Biological Process)
Flavokinase, immobilized, 1629
Flocs, diffusion in, 221
in microbial growth on hydrocarbons, 337
Foam separation, of gentamicin, 2045
Formaldehyde, effect on hold-up in aerated tanks, 1483
Free-energy change, for *S. cerevisiae*, calculation of, 1929
Fusarium moniliforme, protein production by, 707

Gentamicin, separation by foaming, 2045
Glucose isomerase, immobilized, 1711, 2023
stability of, 1345
Glucose oxidase, immobilized, 89, 2061
β-Glucosidase, association with *Thermoactinomyces*, 345
Growth, and phosphate biosynthesis, in yeast, 487
microbial, generalized equations for, 1871

Heat evolution, estimation of, 1289
Hog kidney acylase, kinetics of, 1649
Hollow-fiber reactor, whole cell, 1725
Hydrocarbon fermentations, data consistency and yield parameters in, 2203
Hydrocarbons, microbial growth on, 337, 955, 1133
Hydrogen, microbial production of, 1855
Hydroxysteroid dehydrogenase, immobilized, 39

Immunosorbent, for purification of biological material, 1439
Insecticides, organophosphate, hydrolysis of, 2247
Interferon, human, production of, 433

Kinetics, alcohol fermentation, 1477
citric acid production, 2083, 2093
enzyme, 1649, 2235
enzyme reactor systems, 2329
growth, cells grown on dextran microbeads, 2351
immobilized enzymes, 1499, 1711, 1767, 2303
microbial process, 357, 707, 997, 1031, 1277, 1477, 1561, 1827, 1871
nitrification, 201

Lactobacilli, for preservation of leaf protein, 721
Lactose, continuous flow monitoring of, 1251
Leaching, microbial, 1677, 1685
Leuconostoc mesenteroides, dextran production by, 1121
Light-induced enzyme system, 443
Lignin determination, methods for, 1679
Lignocellulose, biodegraded, 1679
Lignosulfonate, calcium, biodegradation of, 1917
Lipase, synthesis in hydrocarbon fermentations, 1133
Liquid-membranes, for enzyme immobilization, 1079
Lysis, enzymatic, of yeast cell walls, 2011

Magnetic supports for enzyme immobilization, 393, 2359
Manure, cow, growth of *Spirulina maxima* on, 2169
poultry, conversion, to feedstuff, 19
Mass-energy balances, in analysis of continuous processes, 575
Mass transfer, coefficients, measurement in air-sparged systems, 2125
effects, on glucose isomerization, 1711
resistances, analysis of, 503
Material balances, for fermentation processes, 1487
Mathematical models (see Models)
Medium, nonsynthetic, for *Rhizobium* culture production, 1507
Membrane reactor, for soluble enzymes, 1421
Methane production, 333
from energy crops, 1209
Microbial populations, competition in, 627, 1491
Microbial process kinetics, 323, 357, 1387, 1401
Microbial processes, analysis using microfluorometry, 1995

computer-aided scheduling of, 1689
computer control of, 975, 1239
continuous (see Continuous Microbial Processes)
extended batch, 213
fed-batch, 111, 283
material balance calculations for, 1487
parameters, on-line identification of, 1239
solid substrate, 551, 1799
volume changes in, 525
Microfluorometry, flow, for analysis of fermentation processes, 1995
Milk-clotting enzyme, from *Bacillus subtilis*, 535
Mill, high speed, for cell rupture, 745
Models, growth and phosphate biosynthesis in yeast, 487
hydrolysis and fermentation of cellulose, 997
metabolic, citrate production by *Candida lipolytica*, 1373
penicillin fermentation, application of balancing methods, 2175
theoretical, for enzymatic hydrolysis of polysaccharides, 2369
transient phenomena in continuous culture, 2149

NAD sensor, 513
NAD-kinase, immobilized cells containing, 1019
NADP, continuous production by *Brevibacterium ammoniagenes*, 887
Nitrate and nitrate reduction, enzymatic, 1079
Nitrification, rate, effect of substrate concentration on, 201
role of agitation in, 1457
Nitrogenase, of immobilized *Azotobacter vinelandii*, 271
Nucleic acid, reduction in yeast protein, 329
Nylon, for enzyme immobilization, 1607

Optimization, ethanol production from cellulose, 1401
microcarrier cell culture, 821
Oxidoreductase, NAD-dependent, immobilized, 1905
Oxygen, solubility in fermentation media, 1075
Oxygen controller, 1553
exponential, 1469
demand, estimation of, 1289
transfer, in airlift towers, 69

Particles, biological, for use in biological reactors, 193
Peat extracts, microbial protein production from, 1175
Penicillin (benzyl), deacylation of, 1057
Penicillin, production by immobilized cells, 261
Penicillin acylase, immobilized, 1057
Penicillin amidase, immobilized, 1317, 1543
Penicillinase, derivative, immobilized, 897
Penicillium chrysogenum, immobilized, 261
Pepsin, immobilized, 711
pH-stat continuous cultivation, 1517
Phenol, bioprobe electrode for, 671
Phenol hydroxidase, immobilized, 715
Phenyl acetyl carbinol, production by yeasts, 1085
Photosynthesis, mechanisms in microalgae, 159
Polymers, for enzyme immobilization, 679, 847, 863, 1317, 1543
Polysaccharides, enzymatic hydrolysis of, 2369
Protease, immobilized, 2359
Protein, alfalfa, recovery of, 551
feedstuff, from manure, 19, 2169
leaf, wet preservation of, 721
microbial, algal, 1191
from *Brevibacterium sp.*, 1981
of *Candida utilis*, 1963
of *Fusarium moniliforme*, 707
production by *Candida utilis*, 1163, 1175
production from ethanol, 1209
production from pulp and paper wastes, 561
yeast, extractability, 1
Purification, of biological materials, continuous, 1439

Radiation-induced polymerization, for cell immobilization, 679, 847, 867
Reactors, biological process, 69, 2083, 2093, 2341

aeration measurements for, 907
airlift, 69, 1579
biological particles for, 193
fixed film, 2323
hold-up in, 1483
oxygen transfer in, 69, 907
scraped tubular, 593
tower, 69, 1579, 1827
Reactors, differential-bed loop, 89
enzyme, 89, 1421, 1607, 1649, 1749, 2329
immobilized enzyme, 689, 1057, 1499, 1725, 2023, 2303
Reactor properties, high-speed bead mill, 745
Rhizobium, culture production from wastes, 1507
Ribonuclease, immobilized, 1639, 2359
Ribonucleic acid, degradation of, 1639
removal, effects of, 1963

Saccharomyces carlsbergensis, growth and phosphate biosynthesis in, 487
Saccharomyces cerevisiae, cell lysis mutants of, 659
free-energy change for growth, 1929
gaseous metabolism of, 609
Scheduling, batch processes, computer-aided, 1689
Sedimentation, of yeast cells, 1081
Shear, effects on enzymes, 2261, 2279
Single-cell protein (see Protein, Microbial)
Spirulina maxima, growth on cow manure, 2169
Starch, hydrolysis in fluid-bed, immobilized-enzyme reactor, 689
Steam treatment, effect on enzymatic hydrolysis of wood, 1091
Steroid transformation, in organic solvents, 2133
in water–organic solvent systems, 39
Streptomyces aureofaciens, enzyme systems of, 915
Streptomyces phaerochromogenes, immobilization of, 679
Substrate analysis, potentiometric method for, 1905
Surfactants, microbial, production and properties, 1151
Synchronous culture, equipment for, 147
Synchronous sporulation, in extended-batch fermentation, 213

Teflon, porous, for measurement of dissolved gases and volatiles, 1671
Tensides, effect on gas production, 333
Thermoactinomyces, cellulolytic, growth kinetics of, 1277
β-glucosidases in, 345
Thermomonospora curvata, cellulose degradation by, 909
Thiobacillus ferrooxidans, copper solubilization from ore, 1685
Tissue culture processes, 433, 821, 2351
Tower reactors, 69, 1579, 1827
Transients, in continuous culture, 2149
Trichoderma reesei, cellulase production by, 181, 283, 997
quantitative physiology of, 1887
Trichoderma viride, biomass concentration, 153
endoglucanase of, 167
Trickling filter, process design, 417
Trypsin, elution in affinity chromatography, 341

Urease, effects of shear on, 2279
immobilized, 1333, 1607, 2303

Valve, for constant low-rate feeding, 1475
Viscometer, continuous, for biomass concentration, 519
Viscostat, for control of continuous fermentation, 173
Volume changes, during aerobic fermentations, 525

Waste treatment, biological (see Biological Waste Treatment)
Wood, hydrolysis by commercial enzymes, 1091

Yeast, phenyl acetyl carbinol production by, 1085
Yeast cell suspensions, properties of, 1
Yeast cell walls, enzymatic lysis of, 2011
Yeast cells, disintegration of, 1
sedimentation of, 1

Yeast phosphofructokinase, forcing of, 323
Yeast production, computer control of, 975
Yeast protein, extractability, 1
  nucleic acid reduction, 329
  production of, 1163, 1175
Yogurt production, continuous, 1517

Biotechnology and Bioengineering

VOLUME XXI • 1979

Editorial Board:
C.-G. HEDÉN, *Stockholm, Sweden*
M. D. LILLY, *London, England*
D. I. C. WANG, *Cambridge, Massachusetts*

Editor:
ELMER L. GADEN, JR., *Charlottesville, Virginia*

Advisory Board:
E. S. K. CHIAN, *Urbana, Illinois*
I. CHIBATA, *Osaka, Japan*
P. S. S. DAWSON, *Saskatoon, Saskatchewan, Canada*
A. L. DEMAIN, *Cambridge, Massachusetts*
Z. FENCL, *Praha, Czechoslovakia*
A. F. GAUDY, JR., *Stillwater, Oklahoma*
A. E. HUMPHREY, *Philadelphia, Pennsylvania*
M. MANDELS, *Natick, Massachusetts*
R. I. MATELES, *Jerusalem, Israel*
T. L. MILLER, *Kalamazoo, Michigan*
J. S. SCHULTZ, *Ann Arbor, Michigan*
K. L. SMILEY, *Peoria, Illinois*
G. T. TSAO, *West Lafayette, Indiana*

an **Interscience® Publication**
© 1979 by John Wiley & Sons, Inc.

Published monthly, one volume plus symposium per year, by John Wiley & Sons, Inc.
Copyright © 1979 by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 and 108 of the United States Copyright Law without the permission of the copyright owner is unlawful. Second class postage paid at New York, New York, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article appears after the dollar sign and is to be paid through the Copyright Clearance Center, Inc. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the publisher.

Subscription price (1980): $150.00 per volume. Postage and handling outside U.S.A.: $19.00. Please allow 4 weeks for change of address. Back volumes, microfilm, and microfiche are available for previous years. Request price list from publisher.

Claims for undelivered copies must be made no later than three months following month of publication. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

Manuscripts should be submitted in duplicate to DR. ELMER L. GADEN, JR., Department of Chemical Engineering, Thornton Hall, University of Virginia, Charlottesville, Virginia 22903. Address all other correspondence to Journals Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, N.Y. 10016.

Biotechnology and Bioengineering

Contents of Volume XXI, 1979

Issue No. 1, January

Disintegration of Dried Yeast Cells and Its Effect on Protein Extractability, Sedimentation Property, and Viscosity of the Cell Suspension
C-H. Lee, S. K. Tsang, R. Urakabe, and C. K. Rha 1

Process for the Aerobic Conversion of Poultry Manure into High-Protein Feedstuff
M. L. Shuler, E. D. Roberts, D. W. Mitchell, F. Kargi, R. E. Austic, A. Henry, R. Vashon, and H. W. Seeley, Jr. 19

Immobilized Hydroxysteroid Dehydrogenases for the Transformation of Steroids in Water–Organic Solvent Systems
G. Carrea, F. Colombi, G. Mazzola, P. Cremonesi, and E. Antonini 39

Pore Dimensions for Accumulating Biomass. I. Microbes that Reproduce by Fission or by Budding
R. A. Messing and R. A. Oppermann 49

Pore Dimensions for Accumulating Biomass. II. Microbes that Form Spores and Exhibit Mycelial Growth
R. A. Messing, R. A. Oppermann, and F. B. Kolot 59

Oxygen-Transfer Rates and Efficiencies in One- and Two-Stage Airlift Towers
M. E. Orazem and L. E. Erickson 69

Immobilized Glucose Oxidase–Catalase and Their Deactivation in a Differential-Bed Loop Reactor
J. E. Prenosil 89

Start-Up of Chemostat: Application of Fed-Batch Culture
T. Yamané, E. Sada, and T. Takamatsu 111

Studies on the Mechanism of Enzymatic Hydrolysis of Cellulosic Substances
T. K. Ghose and V. S. Bisaria 131

Communications to the Editor

Simple Equipment for Establishing Continuous Synchronous Cultures of Microorganisms
L. Kjaergaard and B. B. Joergensen 147

Use of ATP as an Indicator of Biomass Concentration in the *Trichoderma viride* Fermentation
N. A. Hendy and P. P. Gray 153

Information for Contributors 157

Issue No. 2, February

Applied Microalgae Photosynthesis: Discharge Mechanisms in Highly Illuminated Cells
S. Contreras, M. A. Soto, and J. Toha C. 159

Affinity Chromatography of Endoglucanase of *Trichoderma viride* by Concanavalin A–Agarose
C-S. Gong, L. F. Chen, and G. T. Tsao 167

The Viscostat: Productstat Method of Feed-Rate Control in Continuous Fermentations
R. W. Silman and E. B. Bagley 173

Cellulase Production and Ammonia Metabolism in *Trichoderma reesei* on High Levels of Cellulose
D. Sternberg and S. Dorval 181

Biological Particles of Given Size, Shape, and Density for Use in Biological Reactors
B. Atkinson, G. M. Black, P. J. S. Lewis, and A. Pinches 193

Effect of Initial Substrate Concentration on the Rate of Nitrification in a Batch Experiment
W. K. Shieh and E. J. La Motta 201

Use of an Exchange Filtration Technique to Obtain Synchronous Sporulation in an Extended Batch Fermentation
D. C. Watson and D. R. Berry 213

Effect of Diffusion Limitations and Floc Size Distributions on Fermentor Performance and the Interpretation of Experimental Data
B. Atkinson and F.-Ur- Rahman 221

Carbon Dioxide Fixation by Immobilized Chloroplasts
I. Karube, K. Aizawa, S. Ikeda, and S. Suzuki 253

Penicillin G Production by Immobilized Whole Cells of *Penicillium chrysogenum*
Y. Morikawa, I. Karube, and S. Suzuki 261

Nitrogenase Activity of Immobilized *Azotobacter vinelandii*
E. Seyhan and D. J. Kirwan 271

Production of Cellulases by *Trichoderma reesei* QM 9414 in Fed-Batch and Continuous-Flow Culture with Cell Recycle
T. K. Ghose and V. Sahai 283

Production of Citric Acid in Continuous Culture
B. Kristiansen and C. G. Sinclair 297

Communications to the Editor

High-Resolution Flow-Zonal Centrifuge System
W. J. McAleer, W. Hurni, E. Wasmuth, and M. R. Hilleman 317

Periodic Forcing of the Phosphofructokinase Oscillator in Whole Yeast Cells
M. T. Klein and H. W. Blanch 323

Novel Method for the Reduction of Nucleic Acid in Yeast Protein
K. J. Shetty and J. E. Kinsella 329

Effect of Tensides on Gas Production in an Anaerobic Filter
E. Levonen-Muñoz and Y. Mälkki 333

Microbial Growth on Hydrocarbons: Role of Flocs
K. Kulkarni and S. M. Barnett 337

Elution of Trypsin with an Inhibitor in Affinity Chromatography
E. Sada, S. Katoh, and T. Hieda 341

Issue No. 3, March

Association of β-Glucosidase with Intact Cells of *Thermoactinomyces*
B. Hägerdal, H. Harris, and E. K. Pye 345

Time Scale in the Dynamics of Continuous Cultivation of Microorganisms
I. G. Minkevich and L. I. Utkina 357

Improved Nonporous Magnetic Supports for Immobilized Enzymes
P. J. Halling and P. Dunnill 393

Practical Design Equations for Trickling-Filter Process
M. F. Kong and P. Y. Yang 417

Human Interferon Production with Diploid Fibroblast Cells Grown on Microcarriers
D. J. Giard, D. H. Loeb, W. G. Thilly, D. I. C. Wang, and D. W. Levine . 433

Light-Induced Enzyme System Leading to Pigmentation
K. Kuan, Y. Y. Lee, L. Tebbetts, and P. Mleius 443

Immobilization of Enzymes on Activated Carbon: Selection and Preparation of the Carbon Support
Y. K. Cho and J. E. Bailey 461

Immobilization of Aminoacylase by Adsorption to Tannin Immobilized on Aminohexyl Cellulose
T. Watanabe, T. Mori, T. Tosa, and I. Chibata 477

Mathematical Model of Cell Growth and Phosphatase Biosynthesis in *Saccharomyces carlsbergensis* under Phosphate Limitation
K. Toda and I. Yabe 487

Communications to the Editor

Theoretical Analysis of the Effect of Mass-Transfer Resistances on the Lineweaver–Burk Plot
W. K. Shieh 503

Properties of β-Amylase Immobilized to Alkylamine Porous Silica
C. C. Hon and P. J. Reilly 505

Flow-Through NAD Sensor
A. A. Malinauskas and J. J. Kulys 513

Measurement of Cell Mass Concentration with a Continuous-Flow Viscometer
C. R. Perley, J. R. Swartz, and C. L. Cooney 519

Volume Changes during Aerobic Fermentations
H. Y. Wang 525

Information for Contributors 533

Issue No. 4, April

Purification and Properties of Milk-Clotting Enzyme from *Bacillus subtilis* K-26
L. K. Rao and D. K. Mathur 535

Solid-Substrate Fermentation of Alfalfa for Enhanced Protein Recovery
R. Bajracharya and R. E. Mudgett 551

Pulp and Paper Mill Solid Wastes as Substrates for Single-Cell Protein Production
N. Pamment, C. W. Robinson, and M. Moo-Young 561

Utilization of Mass–Energy Balance Regularities in the Analysis of Continuous-Culture Data
L. E. Erickson, I. G. Minkevich, and V. K. Eroshin 575

Design of Scraped Tubular Fermentors
M. Moo-Young, G. Van Dedem, and A. Binder 593

Investigation of the Significance of a Carbon and Redox Balance to the Measurement of Gaseous Metabolism of *Saccharomyces cerevisiae*
J. P. Barford and R. J. Hall 609

Biomass Recycling and Species Competition in Continuous Cultures
J. C. Weissman and J. R. Benemann 627

Removal of Diacetyl from Beer by Adsorbants and Diacetyl Reductase
K. G. Gupta, A. K. Jain, and S. Dhawan 649

Process Characteristics of Cell Lysis Mutants of *Saccharomyces cerevisiae*
J. Boudrant, J. DeAngelo, A. J. Sinskey, and S. R. Tannenbaum 659

Bioprobe Electrode for Phenol
H. Y. Neujahr and K. G. Kjellén 671

Immobilization of *Streptomyces phaerochromogenes* by Radiation-Induced Polymerization of Glass-Forming Monomers
M. Kumakura, M. Yoshida, and I. Kaetsu 679

Fluidized-Bed Immobilized-Enzyme Reactor for the Hydrolysis of Cornstarch to Glucose
B. R. Allen, M. Charles, and R. W. Coughlin 689

Communications to the Editor

Effect of Growth Rate on the Amino Acid Composition of *Fusarium moniliforme* Cultivated Continuously for Fungal Protein Production
B. J. Macris and R. Kokke 707

Alkaline Phosphatase and Pepsin Immobilized in Gels
S. Hirano and O. Miura 711

Immobilization of Phenol Hydroxylase
K. G. Kjellén and H. Y. Neujahr 715

Wet Preservation of Leaf Protein Concentrate by *Lactobacilli*
G. Y. Szakács and E. Madas 721

Issue No. 5, May

Energetic Efficiency of Biomass and Product Formation
L. E. Erickson 725

Reactor Properties of a High-Speed Bead Mill for Microbial Cell Rupture
J. Limon-Lason, M. Hoare, C. B. Orsborn, D. J. Doyle, and P. Dunnill .. 745

Large-Scale Isolation of Equine Liver Alcohol Dehydrogenase on a Blue Agarose Gel
S. K. Roy and A. H. Nishikawa 775

Assimilation Efficiency and Energy Contents of Prototrophic Bacteria
K. P. Ho and W. J. Payne 787

Maximization of *Candida utilis* Cytochromes by Pulse Additions of Ethanol to Continuous Cultures
R. Cail, P. A. D. Rickard, and P. L. Rogers 803

Optimization of Growth Surface Parameters in Microcarrier Cell Culture
D. W. Levine, D. I. C. Wang, and W. G. Thilly 821

Enzyme Immobilization by Radiation-Induced Polymerization of 2-Hydroxyethyl Methacrylate at Low Temperatures
I. Kaetsu, M. Kumakura, and M. Yoshida 847

Enzyme Immobilization by Radiation-Induced Polymerization of Hydrophobic Glass-Forming Monomers at Low Temperatures
I. Kaetsu, M. Kumakura, and M. Yoshida 863

Effect of Environmental Parameters on the Efficiency of Biodegradation of Basalt Rock by Fungi
A. P. Mehta, A. E. Torma, and L. E. Murr 875

Continuous Production of NADP by Immobilized *Brevibacterium ammoniagenes* Cells
K. Murata, J. Kato, and I. Chibata 887

Preparation and Properties of an Immobilized Derivative of Penicillinase
Y. Klemes and N. Citri 897

Communications to the Editor

Measurement of Fermentor Aeration Capacity by a Fast-Response Oxygen Electrode in Medium–Air Dispersions
V. Linek and V. Vacek 907

Degradation of Cellulosic Substances by *Thermomonospora curvata*
F. J. Stutzenberger 909

Issue No. 6, June

Fractionation of the Proteolytic and Amylolytic Complex Enzyme System of *Streptomyces aureofaciens* and Some Properties of Fractions
C. Laluce and R. Molinari 915

Immobilization and Characterization of D-Amino Acid Oxidase
K. Parkin and H. O. Hultin 939

Characterization of Hydrocarbon Emulsification and Solubilization Occurring during the Growth of *Endomycopsis lipolytica* on Hydrocarbons
P. K. Roy, H. D. Singh, S. D. Bhagat, and J. N. Baruah 955

Computer Control of Bakers' Yeast Production
H. Y. Wang, C. L. Cooney, and D. I. C. Wang 975

Mathematical Model for Enzymatic Hydrolysis and Fermentation of Cellulose by *Trichoderma*
N. Peitersen and E. W. Ross, Jr. 997

Immobilization of Microbial Cells Containing NAD-Kinase
T. Hayashi, Y. Tanaka, and K. Kawashima 1019

Correlation between X-Ray Diffraction Measurements of Cellulose Crystalline Structure and the Susceptibility to Microbial Cellulase
T. Sasaki, T. Tanaka, N. Nanbu, Y. Sato, and K. Kainuma 1031

Growth and Composition of *Escherichia coli* Subjected to Square-Wave Perturbations in Nutrient Supply: Effect of Varying Frequencies
A. M. Pickett, M. J. Bazin, and H. H. Topiwala 1043

Deacylation of Benzylpenicillin by Immobilized Penicillin Acylase in a Continuous Four-Stage Stirred-Tank Reactor
S. W. Carleysmith and M. D. Lilly 1057

Communications to the Editor

Estimation of O_2 and CO_2 Solubilities in Fermentation Media
A. Schumpe and W.-D. Deckwer 1075

Nitrate and Nitrite Reduction by Liquid-Membrane-Encapsulated Enzymes and Whole Cells
R. R. Mohan and N. H. Li 1079

Shallow-Depth Sedimentation of Yeast Cells
T. J. Walsh and H. R. Bungay 1081

Production of Phenyl Acetyl Carbinol by Yeasts
K. G. Gupta, J. Singh, G. Sahni, and S. Dhawan 1085

Effect of Steam Treatment on the Hydrolysis of Aspen by Commercial Enzymes
D. G. Macdonald and J. F. Mathews 1091

Determination of Biomass Concentration by Capacitance Measurement
M. A. Gencer and R. Mutharasan 1097

Issue No. 7, July

Symposium on Microbial Products and Fermentation Control

Introduction
B. Volesky 1105

Ethanol in Brazil: Brief Summary of the State of Industry in 1977
L. R. Lindeman and C. Rocchiccioli 1107

Dextran Biosynthesis and Dextransucrase Production by Continuous Culture of *Leuconostoc mesenteroides*
G. R. Lawford, A. Kligerman, T. Williams, and H. G. Lawford 1121

Lipase Synthesis in Hydrocarbon Fermentation
N. Kosaric, J. E. Zajic, G. Aboue, T. Jack, and D. Gerson 1133

Production and Surface-Active Properties of Microbial Surfactants
A. Margaritis, J. E. Zajic, and D. F. Gerson 1151

Production of High-Quality Edible Protein from *Candida* Yeast Grown in Continuous Culture
G. R. Lawford, A. Kligerman, T. Williams, and H. G. Lawford 1163

Production of *Candida utilis* Protein from Peat Extracts
P. Quierzy, N. Therien, and A. Leduy 1175

Algal Single Cell Protein from Wastewater Treatment and Renovation Process
R. Moraine, G. Shelef, A. Meydan, and A. Levi 1191

Biological Production of Methane from Energy Crops
E. C. Clausen, O. C. Sitton, and J. L. Gaddy 1209

Production of Single Cell Protein from Ethanol by Fed-Batch Process
C. M. Watteeuw, W. B. Armiger, D. L. Ristroph, and A. E. Humphrey . 1221

On-Line Identification of Parameters in a Fermentation Process
J. P. Bravard, M. Cordonnier, J. P. Kernevez, and J. M. Lebeault 1239

Continuous-Flow Monitoring of Lactose Concentration
B. Volesky and C. Emond 1251

Use of Continuous-Culture Techniques for Determining the Growth Kinetics of a Cellulolytic *Thermoactinomyces* sp.
S. E. Lee and A. E. Humphrey 1277

Process Analysis and Optimal Design of a Fermentation Process Based upon Elemental Balance Equations: Generalized Semitheoretical Equations for Estimating Rates of Oxygen Demand and Heat Evolution
L. Ho 1289

Application of a Bioluminescence ATP Assay in Brewery Wastewater Treatment Studies
D. W. Hysert, F. B. Knudsen, N. M. Morrison, G. Van Gheluwe, and T. Lom 1301

Information for Contributors 1315

Issue No. 8, August

Enzyme Immobilization Techniques on Poly(Glycidyl Methacrylate-Co-Etheylene Dimethacrylate) Carrier with Penicillin Amidase as Model
J. Drobník, V. Saudek, F. Švec, J. Kálal, V. Vojtíšek, and M. Bárta ... 1317

Urease Bound to Chitin with Glutaraldehyde
L. Iyengar and A. V. S. P. Rao 1333

Proteolytic Denaturation and Methods of Improving the Stability of Glucose Isomerase Preparations
D. Adler, H. Lim, D. Cottle, and A. Emery 1345

Secretion of Cellulase and β-Glucosidase by *Trichoderma viride* ITCC-1433 in Submerged Culture on Different Substrates
D. Herr 1361

Identification of Metabolic Model: Citrate Production from Glucose by *Candida lipolytica*
S. Aiba and M. Matsuoka 1373

Rapid Ethanol Fermentation of Cellulose Hydrolysate. I. Batch Versus Continuous Systems
T. K. Ghose and R. D. Tyagi 1387

Rapid Ethanol Fermentation of Cellulose Hydrolysate. II. Product and Substrate Inhibition and Optimization of Fermentor Design
T. K. Ghose and R. D. Tyagi 1401

Theoretical and Experimental Analysis of a Soluble Enzyme Membrane Reactor
G. Greco, Jr., F. Alfani, G. Iorio, M. Cantarella, A. Formisano, L. Gianfreda, R. Palescandolo, and V. Scardi 1421

Method for Continuous Purification of Biological Material Using Immunosorbent
J. J. Hughes and S. E. Charm 1439

Role of Agitation Conditions in Nitrification
L. T. Novak 1457

Communications to the Editor

Construction of an Exponential Oxygen Controller
J. Field, C. A. Morris, and P. J. Rogers 1469

Simple Valve for Constant Low-Rate Liquid Feeder
W. Borzani 1475

Kinetics of Alcohol Fermentation at High Yeast Levels
E. J. del Rosario, K. J. Lee, and P. L. Rogers 1477

Effect of Formaldehyde on Hold-Up in Aerated, Stirred Tanks
A. W. Nienow and V. Machon 1483

Material–Balance Calculations of Fermentation Processes
F. Madron 1487

Effect of Spatial Inhomogeneities on the Coexistence of Competing Microbial Populations
G. Stephanopoulos and A. G. Fredrickson 1491

New Method for Determining Kinetic Constants for Immobilized Enzymes in a Packed-Bed Reactor System
S. B. Lee and D. D. Y. Ryu 1499

Issue No. 9, September

New Nonsynthetic Medium for *Rhizobium* Culture Production from Wastes
S. L. Gulati 1507

Analysis of pH-Stat Continuous Cultivation and the Stability of the Mixed Fermentation in Continuous Yogurt Production
R. D. MacBean, R. J. Hall, and P. M. Linklater 1517

Properties of Penicillin Amidase Immobilized by Copolymerization with Acrylamide
A. Szewczuk, E. Ziomek, M. Mordarski, M. Siewiński, and J. Wieczorek 1543

Cost-Effective Dissolved Oxygen Monitor–Controller for Continuous Culture
F. Archibald 1553

Activated-Sludge Process Dynamics with Continuous Total Organic Carbon and Oxygen Uptake Measurements
R. Mona, I. J. Dunn, and J. R. Bourne 1561

Bubble Flow in the Downflow Section of an Airlift Tower
M. E. Orazem, L. T. Fan, and L. E. Erickson 1579

Multilayer Immobilized-Enzyme Filter Reactors: Urease Bound to Nylon Fabric Filters
L. Shemer, R. Granot, A. Freeman, M. Sokolovsky, and L. Goldstein .. 1607

Preparation and Properties of Immobilized Flavokinase
A. H. Merrill, Jr. and D. B. McCormick 1629

Degradation of Ribonucleic Acid by Immobilized Ribonuclease
B. E. Dale and D. H. White 1639

Problems in Extrapolation of Enzymatic Kinetic Measurements to Reactor Design Using Hog Kidney Acylase as an Example
C. Wandrey, E. Flaschel, and K. Schügerl 1649

Communications to the Editor

Use of the Porous Teflon Tubing Method to Measure Gaseous or Volatile Substances Dissolved in Fermentation Liquids
K. Dairaku and T. Yamané 1671

Airlift for Bacterial Leaching Tests
W. Borzani and S. Vaisbich 1677

Utility of Oxidative Lignin Determination Methods for Biodegraded Lignocellulosic Substrates
L. C.-F. Wu and W. G. Glasser 1679

Comparison of Copper Solubilization from Chalcopyrite Waste Using *Thiobacillus ferrooxidans* and a Natural Thermophilic Microorganism: Laboratory Studies
N. Chakraborti and L. E. Murr 1685

Computer-Aided Scheduling of Multiproduct Batch Fermentation Plants
A. Prokop and J. Votruba 1689

Erratum

Theoretical Analysis of the Effect of Mass-Transfer Resistances on the Lineweaver–Burk Plot
W. K. Shieh 1695

Issue No. 10, October

Immobilization of Enzymes and Microbial Cells Using Carrageenan as Matrix
T. Tosa, T. Sato, T. Mori, K. Yamamoto, I. Takata, Y. Nishida, and I. Chibata 1697

Mass-Transfer Effects on the Rate of Isomerization of D-Glucose into D-Fructose, Catalyzed by Whole-Cell Immobilized Glucose Isomerase
J. G. Boersma, K. Vellenga, H. G. J. de Wilt, and G. E. H. Joosten 1711

Whole-Cell Hollow-Fiber Reactor: Effectiveness Factors
I. A. Webster, M. L. Shuler, and P. R. Rony 1725

Use of an Enzyme Thermistor in Continuous Measurements and Enzyme Reactor Control
B. Danielsson, B. Mattiasson, R. Karlsson, and F. Winqvist 1749

Kinetics and Stability of Immobilized Chicken Liver Xanthine Dehydrogenase
J. Tramper, S. A. G. F. Angelino, F. Müller, and H. C. van der Plas ... 1767

Analysis of Denitrification with a Completely Submerged Pilot-Scale Rotating Biological Contactor
S. Soyupak, K. L. Murphy, and B. E. Jank 1787

Production of Aflatoxin in Corn by a Large-Scale Solid-Substrate Fermentation Process
R. W. Silman, H. F. Conway, R. A. Anderson, and E. B. Bagley 1799

Effect of Interstage Mixing in Multistage Culture Systems on Continuous Biomass Production
J. Páca and V. Grégr 1809

Effect of P_{O_2} on Growth and Physiological Characteristics of *Candida utilis* in a Multistage Tower Fermentor
J. Páca and V. Grégr 1827

Microbial Electrode Sensor for Alcohols
M. Hikuma, T. Kubo, T. Yasuda, I. Karube, and S. Suzuki 1845

Communications to the Editor

Effects of Nitrogen Supply on Hydrogen Production by Cultures of *Anabaena cylindrica*
K. Miyamoto, P. C. Hallenbeck, and J. R. Benemann 1855

New Method of Measuring Cell-Wall Rupture
C. R. Engler and C. W. Robinson 1861

Generalized Differential Specific Rate Equation for Microbial Growth
F. Kargi and M. L. Shuler 1871

Chemically Modified Electrodes Bearing Grafted Enzymes
C. Bourdillon, J.-P. Bourgeois, and D. Thomas 1877

Rapid Analytical Extraction of Volatile Fermentation Products
N. B. Jansen, M. C. Flickinger, and G. T. Tsao 1881

Information for Contributors 1885

Issue No. 11, November

Studies on Quantitative Physiology of *Trichoderma reesei* with Two-Stage Continuous Culture for Cellulase Production
D. Ryu, R. Andreotti, M. Mandels, B. Gallo, and E. T. Reese 1887

Potentiometric Method for Substrate Analysis Using Immobilized NAD^+-Dependent Oxidoreductase Enzymes
A. K. Chen, C. C. Liu, and J. G. Schiller 1905

Rapid Biodegradation of Calcium Lignosulfonate by Means of a Mixed Culture of Microorganisms
S. Ban, M. Glanser-Šoljan, and M. Smailagić 1917

Alternate Method of Calculating the Free-Energy Change Accompanying the Growth of *Saccharomyces cerevisiae* (Hansen) on Three Substrates
E. H. Battley 1929

Effects of Ribonucleic Acid Removal Methods on Proteolytic Activity and Protein Solubility in *Candida utilis*
D. L. Gierhart and N. N. Potter 1963

Influence of Substrate on the Amino Acid Profile and Macromolecular Composition of a *Brevibacterium* Species
L. T. Miller and D. W. Thayer 1981

Analysis of Fermentation Processes Using Flow Microfluorometry: Single-Parameter Observations of Batch Bacterial Growth
J. Fazel-Madjlessi and J. E. Bailey 1995

Enzymatic Lysis of Yeast Cell Walls
D. Knorr, K. J. Shetty, and J. E. Kinsella 2011

Effects of External Diffusion and Design Geometry on the Performance of Immobilized Glucose Isomerase Reactor System
S. B. Lee, S. M. Kim, and D. D. Y. Ryu 2023

Separation of Gentamicin by Foaming
S. B. Lee and D. D. Y. Ryu 2045

Analysis of the Coupled Transport, Reaction, and Deactivation Phenomena in the Immobilized Glucose Oxidase and Catalase System

Issue No. 12, December

Physical Studies on Cell Immobilization Using Calcium Alginate Gels
P. S. J. Cheetham, K. W. Blunt, and C. Bucke 2155

Growth of *Spirulina maxima* on Cow-Manure Wastes
G. Oron, G. Shelef, and A. Levi 2169

Application of Balancing Methods in Modeling the Penicillin Fermentation
J. J. Heijnen, J. A. Roels, and A. H. Stouthamer 2175

Evaluation of Data Consistency and Estimation of Yield Parameters in Hydrocarbon Fermentations
A. Ferrer and L. E. Erickson 2203

Convenient Method for Studying Enzyme Kinetics
T.-A. Hsu and G. T. Tsao 2235

Hydrolysis of Organophosphate Insecticides by an Immobilized-Enzyme System
D. M. Munnecke 2247

Action of Shear on Enzymes: Studies with Alcohol Dehydrogenase
C. R. Thomas, A. W. Nienow, and P. Dunnill 2263

Action of Shear on Enzymes: Studies with Catalase and Urease
C. R. Thomas and P. Dunnill 2279

Hydrolysis of Urea by Gelatin-Immobilized Urease: Separation of Kinetic and Diffusion Phenomena in a Model Immobilized-Enzyme Reactor System
J. P. Bollmeier and S. Middleman 2303

Communications to the Editor

Recirculation of Biological Solids over a Fixed-Film Biological Reactor
E. E. Cook and B. C. Wu 2323

Determination of Kinetic Constants in Enzyme Reactor Systems by Transformation of Variables
S. B. Lee and D. D. Y. Ryu 2329

Effects of Glucose on the Activity and Synthesis of Fermentative and Respiratory Pathways of *Candida utilis*
P. A. D. Rickard and J. W. Hewetson 2337

Power Drawn by Multiple Impellers in Sparged Agitated Vessels
A. W. Nienow and M. D. Lilly 2341

Ethanol from Sugar Cane: EX-FERM Concept
C. Rolz, S. de Cabrera, and R. García 2347

Culture of Diploid and Heteroploid Cells on Dextran "Microbeads" in Suspension: Studies of Growth Kinetics
Y. Beaudry, J. P. Quillon, J. Frappa, R. Deloince, and R. Fontanges .. 2351

Nonporous Magnetic Supports for Proteases, Cell-Lytic Enzymes, and Ribonuclease: Limits of Reactant Size
P. J. Halling, J. A. Asenjo, and P. Dunnill 2359

Reusable Enzyme Catalysts for Particulate and Macromolecular Reactants and Fouling Media
P. J. Halling and P. Dunnill 2365

Comments on Two Theoretical Models of Enzymatic Hydrolysis of Polysaccharides
T. A. Hsu and G. T. Tsao 2369

Author Index 2373

Subject Index 2383

In Appreciation 2389
